Education

Massachusetts Institute of Technology, Cambridge, MA
Bachelor of Science in Computer Science & Engineering
Dual Degree in Brain & Cognitive Science

May 2027
GPA: 4.75

Relevant Coursework: Data Structures & Algorithms, Deep Learning, Machine Learning, Computer Vision, Software Construction, Computer Systems, Computation Structures, Algebraic Combinatorics, Probability & Statistics, Programming Fundamentals, Discrete Math

Technical Skills

Programming Languages: Python, Java, C/C++, JavaScript, Swift, MATLAB, Assembly | Web Technologies: React.js, Next.js, Node.js, HTML, CSS, REST APIs | AI/ML: PyTorch, TensorFlow, Synthetic Data Generation, Post training, SFT, NLP, CV, Deep Learning | Databases: MySQL, SQL, Postgres

Work Experience

Letta Inc.

June 2025 – Present

Member of Technical Staff Intern

San Francisco, CA

- Building multi-turn SFT & post-training pipelines, including synthetic data generation workflows, improving model performance.
- Engineering scalable evaluation and benchmarking infrastructure for memory-dependent tasks across distributed backend systems.
- Developing production level engineering solutions for agent capabilities and integrating models with backend functionalities.

MIT CSAIL – Language and Intelligence Group

Sep. 2024 – Present

Machine Learning Research Engineer (NLP)

Cambridge, MA

- Designed automated training and evaluation pipelines to enhance multilingual model responses based on real-time user input.
- Delivered dataset with 1200+ datapoints of prompts, model completions, and binary data across 100+ users, in 10+ languages.

MIT EECS

Jan. 2025 – Present

Lab Teaching Assistant for 6.390 (Intro to Machine Learning)

Cambridge, MA

- Conduct weekly lab sessions and office hours for 30+ students using hands-on demonstrations and personalized guidance.
- Review and help revise course material during staff meetings and assess student understanding of content during lab hours.

Scale AI

Nov. 2024 – Present

Technical Advisor – Gen AI Intern

Remote/Hybrid

- Assess and develop complex STEM problems & solutions to enhance training datasets for generative AI models for corporate clients.
- Analyze model chain-of-thought reasoning & problem-solving capabilities, contributing to model development & technical blog post.

MIT Energy Initiative

Jun. 2024 – Dec. 2024

Computational Research Intern

Cambridge, MA

- Developed a deep learning surrogate model (*FracNet*) trained on 5,000+ high-fidelity simulations of fractured rock networks.
- Achieved fast approximations of subsurface flow & identified network behavior signatures to improve predictive performance.

Dana Farber Cancer Institute

Jun. 2024 – Sep. 2024

Machine Learning Summer Researcher

Boston, MA

- Generalized the OncoNPC (classifier for cancers of unknown primaries) with various retraining methods and novel forms of data.
- Identified approaches for optimizing training pipeline to maximize performance & calibrated predictor confidence scores.

Picower Institute for Learning and Memory (MIT)

Nov. 2023 – Jun. 2024

Undergraduate Researcher

Cambridge, MA

- Developed visual stimulus protocols to analyze neural activity in mouse V1; optimized imaging workflows with relational databases.
- Built a machine learning-based classifier to analyze time-series data and uncover insights into memory-related neural processes.

Leadership & Volunteering

AIM (AI @ MIT)

Sep. 2023 – Present

Executive Team Member - Permeate Director

- Established Permeate initiative, leading student teams to develop AI solutions for local nonprofits with consulting-style partnerships.
- Developed Mandarin speech tone corrector using transformer model & deployed with full stack (Flask, Next.js, CSS, TypeScript).

MIT Society of Women Engineers (SWE)

Oct. 2023 – Present

Technology Chair

- Building MIT SWE website with web dev frameworks for frontend and organizing technical workshops for members.
- Maintaining MIT SWE social media channels to act as an informational resource targeted at promoting young women in STEM.

GirlCon International Technology Conference (www.girlcon.org)

Jun. 2023 – Present

Board of Directors

- Organized largest intl. tech conference aimed at exposing women & nonbinary students to opportunities in ‘Tech + X’ industries.
- Spearheaded global chapter-development system; liaison for Sponsorships National Team and managed corporate sponsors.

Awards & Accomplishments

Diversity in Tech Awards – Young Female STEM Pioneer Finalist | LinkedIn Top Computer Science Voice | 2x Top 20 Intl. Finalist - HOSA Medical Innovation | NCWIT AspireIT Impact Award | 2x USABO National Semifinalist | 3x NCWIT AiC National Honorable Mention
